History

ASPNETMVCEExample

This is a responsive HTML CSS template that I modified to be implemented in Visual Studio. I split the pages in views and created the controllers. This project was intended for personal learning of ASP.Net MVC 5/C# and Visual Studio 2019 and as a portfolio. It is not free from errors. I am still learning!

Features

- Responsive HTML template
- ASP.Net MVC 5, C#
- Contact form programmed (C#)

License

You are free to use this project for personal learning, however, if you wish to use it and the template to publish a website, you can buy the license from http://preview.themeforest.net/item/hamar-one-page-corporate-html-template/full_screen_preview/19407506?ref=freshdesignweb and reuse the code, or at least to be a guide.
